MECHANISMS OF AGEING AND DEVELOPMENT

AUTHOR INDEX

Volume 55 (1990)

Bender, B.S. 1
Bensch, K.G. 181
Benzi, G. 171
Berger, L. 199
Butenko, G.M. 39

Callaerts, A. 189
Choi, S. 181
Cider, N. 69
Coecke, S. 189
Corberand, J.X. 89
Curti, D. 171

Deyl, Z. 39

Flemming, J.E. 181
Freeman, J.R. 69
Fugaccia, I. 171
Fukuda, M. 245

Geertzen, H.G.M. 89
Giangare, M.C. 171
Goodrick, C.L. 69

Harmon, H.J. 151
Hauke, S. 199
Hausmann, J. 39
Hijmans, W. 89
Horakova, M. 39

Ingram, D.K. 69
Ito, H. 245
Ivanova, V.F. 161

Jenski, L. 107
Johnson M.P. 1
Juckett, D.A. 255

Kadar, T. 139
Kaji, K. 245
Kapitanov, A.B. 161
Knook, D.L. 89

Ladino, C.A. 123
Ladygina, V.G. 161
Levy, A. 139
Ligthart, G.J. 89

Macek, K. 39
Meinders, A.E. 89
Mishra, N.C. 15

Niagro, F.D. 15

O'Connor, C.M. 123

Redolfi, M.E. 171
Reynolds, M.A. 69
Riggs, J.E. 207,221,235
Rikans, L.E. 61
Rogiers, V. 189
Rosenberg, B. 255

Shigeoka H. 49
Shimada, Y. 245
Silbermann, M. 139

MECHANISMS OF AGEING AND DEVELOPMENT

SUBJECT INDEX

Volume 55 (1990)

accessory molecules, aging, cytotoxic lymphocytes, clones, 107
Acholeplasma laidlawii, membrane, cholesterol, microviscosity, H^+-ATPase, glucose-binding protein, cell ageing, 161
age, hepatic cytosolic glutathione *S*-transferase, sex, phenobarbital, 189
ageing, immunogerontology, health, T-cells, autoantibodies, gammopathy, 89
ageing, red blood cells, physical training, 199
aging, amyotrophic lateral sclerosis, mortality, epidemiology, 207
aging, brain regions, cytochrome *c* oxidase, nonsynaptic mitochondria, synaptosomes, 171
aging, cytochrome oxidase, mitochondria, carbon monoxide, 151
aging, cytotoxic lymphocytes, clones, accessory molecules, 107
aging, diet restriction, nutrition, genetics, survival, mortality, growth, 69
aging, hippocampus, muscarinic receptors, working memory, autoradiography, rat, 139
aging, human mortality, survivorship, Weibull function, disease, parametric analysis, 255
aging, influenza, T-lymphocytes, vaccine, 1
aging, Parkinsons's disease, mortality, epidemiology, 221
aging, senescence, human diploid fibroblast, transcription, phosphorylation, kinase C, 49
aging, stroke, cerebrovascular disease, mortality, epidemiology, 235
amyotrophic lateral sclerosis, aging, mortality, epidemiology, 207
ascorbate, senescence, lens, transport, 181
autoantibodies, ageing, immunogerontology, health, T-cells, gammopathy, 89
autoradiography, aging, hippocampus, muscarinic receptors, working memory, rat, 139

brain regions, aging, cytochrome *c* oxidase, nonsynaptic mitochondria, synaptosomes, 171

carbon monoxide, cytochrome oxidase, aging, mitochondria, 151
cellular aging, endothelial cells, tumor necrosis factor, 245
cell ageing, *Acholeplasma laidlawii*, membrane, cholesterol, microviscosity, H^+-ATPase, glucose-binding protein, 161
cerebrovascular disease, stroke, mortality, aging, epidemiology, 235
cholesterol, *Acholeplasma laidlawii*, membrane, microviscosity, H^+-ATPase, glucose-binding protein, cell ageing, 161
clones, aging, cytotoxic lymphocytes, accessory molecules, 107
collagen, glycation, pigmentation, parabiosis, 39
cytochromes, induced senescence, mutation, mitochondria, ultrastructure, 15
cytochrome *c* oxidase, aging, brain regions, nonsynaptic mitochondria, synaptosomes, 171
cytochrome oxidase, aging, mitochondria, carbon monoxide, 151
cytotoxic lymphocytes, aging, clones, accessory molecules, 107

diet restriction, nutrition, genetics, aging, survival, mortality, growth, 69
disease, human mortality, survivorship, Weibull function, aging, parametric analysis, 255
drug metabolism, ethanol, zoxazolamine, 61

endothelial cells, cellular aging, tumor necrosis factor, 245
epidemiology, amyotrophic lateral sclerosis, aging, mortality, 207
epidemiology, Parkinsons's disease, aging, mortality, 221
epidemiology, stroke, cerebrovascular disease, mortality, aging, 235
erythrocyte aging, protein methylation, methyl ester, 123
ethanol, drug metabolism, zoxazolamine, 61

food intake, reproductive success, median longevity, 9

gammopathy, ageing, immunogerontology, health, T-cells, autoantibodies, 89
genetics, diet restriction, nutrition, aging, survival, mortality, growth, 69
glucose-binding protein, *Acholeplasama laidlawii*, membrane, cholesterol, microviscosity, H^+-ATPase, cell ageing, 161
glycation, collagen, pigmentation, parabiosis, 39
growth, diet restriction, nutrition, genetics, aging, survival, mortality, 69

H^+-ATPase, *Acholeplasma laidlawii*, membrane, cholesterol, microviscosity, glucose-binding protein, cell ageing, 161
health, ageing, immunogerontology, T-cells, autoantibodies, gammopathy, 89
hepatic cytosolic glutathione *S*-transferase, age, sex, phenobarbital, 189
hippocampus, aging, muscarinic receptors, working memory, autoradiography, rat, 139
human diploid fibroblast, senescence, aging, transcription, phosphorylation, kinase C, 49
human mortality, survivorship, Weibull function, aging, disease, parametric analysis, 255

immunogerontology, ageing, health, T-cells, autoantibodies, gammopathy, 89
induced senescence, mutation, mitochondria, cytochromes, ultrastructure, 15
influenza, aging, T-lymphocytes, vaccine, 1

kinase C, senescence, aging, human diploid fibroblast, transcription, phosphorylation, 49

lens, ascorbate, senescence, transport, 181

median longevity, reproductive success, food intake, 9
membrane, *Acholeplasma laidlawii*, cholesterol, microviscosity, H^+-ATPase, glucose-binding protein, cell ageing, 161
methyl ester, protein methylation, erythrocyte aging, 123
microviscosity, *Acholeplasma laidlawii*, membrane, cholesterol, H^+-ATPase, glucose-binding protein, cell ageing, 161
mitochondria, cytochrome oxidase, aging, carbon monoxide, 151
mitochondria, induced senescence, mutation, cytochromes, ultrastructure, 15
mortality, amyotrophic lateral sclerosis, aging, epidemiology, 207
mortality, diet restriction, nutrition, genetics, aging, survival, growth, 69
mortality, Parkinsons's disease, aging, epidemiology, 221
mortality, stroke, cerebrovascular disease, aging, epidemiology, 235
muscarinic receptors, aging, hippocampus, working memory, autoradiography, rat, 139
mutation, induced senescence, mitochondria, cytochromes, ultrastructure, 15

non-synaptic mitochondria, aging, brain regions, cytochrome *c* oxidase, synaptosomes, 171
nutrition, diet restriction, genetics, aging, survival, mortality, growth, 69

parabiosis, collagen, glycation, pigmentation, 39
parametric analysis, human mortality, survivorship, Weibull function, aging, disease, 255
Parkinsons's disease, aging, mortality, epidemiology, 221
phenobarbital, hepatic cytosolic glutathione *S*-transferase, age, sex, 189
phosphorylation, senescence, aging, human diploid fibroblast, transcription, kinase C, 49
physical training, red blood cells, ageing, 199
pigmentation, collagen, glycation, parabiosis, 39
protein methylation, erythrocyte aging, methyl ester, 123

rat, aging, hippocampus, muscarinic receptors, working memory, autoradiography, 139
red blood cells, ageing, physical training, 199
reproductive success, median longevity, food intake, 9

senescence, aging, human diploid fibroblast, transcription, phosphorylation, kinase C, 49
senescence, ascorbate, lens, transport, 181
sex, hepatic cytosolic glutathione *S*-transferase, age, phenobarbital, 189
stroke, cerebrovascular disease, mortality, aging, epidemiology, 235
survival, diet restriction, nutrition, genetics, aging, mortality, growth, 69
survivorship, human mortality, Weibull function, aging, disease, parametric analysis, 255
synaptosomes, aging, brain regions, cytochrome *c* oxidase, non-synaptic mitochondria, 171

T-cells, ageing, immunogerontology, health, autoantibodies, gammopathy, 89
T-lymphocytes, aging, influenza, vaccine, 1
transcription, senescence, aging, human diploid fibroblast, phosphorylation, kinase C, 49
transport, ascorbate, senescence, lens, 181

tumor necrosis factor, cellular aging, endothelial cells, 245

ultrastructure, induced senescence, mutation, mitochondria, cytochromes, 15

vaccine, aging, influenza, T-lymphocytes, 1

Weibull function, human mortality, survivorship, aging, disease, parametric analysis, 255
working memory, aging, hippocampus, muscarinic receptors, autoradiography, rat, 139

zoxazolamine, drug metabolism, ethanol, 61
